

*Catrin Eleri Bridle*

09/01/2007 – 30/05/2008

Our beautiful little girl was diagnosed with Non-Ketotic Hyperglycinemia shortly after her birth.

Despite all the challenges her short life threw at her, Catrin faced everything with a patience, strength & dignity which was an inspiration to us all. Catrin loved her cuddles and with her deep blue eyes & wavy hair, everyone who met her fell in love with her.

Catrin, your family & friends miss you so much. You are forever in our hearts & thoughts.

Setting up the Galaxy Tribute Fund is our way of remembering our little lady.

All our love,

Seren fach ni
