

Millie Rickards

Millie was diagnosed with MCADD following her newborn screening in December 2014. As we approach her first birthday the initial shock has subsided and we are able to appreciate that her first year has gone well. We have tried to give Millie the same experiences as her older brother, Max. This has included baby sensory, twisting tots, playgroups and swimming lessons, all of which Millie has really enjoyed. This inspired us to do our first Climb fundraising event... 'Millie and Friends sponsored swim' raising £1620. The response and support was phenomenal and a positive experience for all of the family. We then decided to open a Galaxy Tribute Fund to celebrate Millie's 1st birthday, to thank Climb for their support and to encourage us to continue fundraising. Millie and Max will be working hard to reach the target.
