

Tommy

This is Tommy, he was two years old on the 26th of March 2012. Tommy has Leigh Disease, this is a metabolic disease, something we didn't know anything about or even that such a disease existed until Tommy was diagnosed when he was a year old.

Tommy is a lovely little boy, he doesn't sit up, walk or talk yet but he knows what he likes and doesn't like. First thing in the morning he gives us a big smile, then during the day he laughs, smiles, giggles and plays with whatever toys are suitable and safe for him. He loves music, dancing, watching Peppa Pig on television and of course he loves sitting on the couch having a snuggle.

Everyone loves Tommy and watching him try so hard to do everyday things makes us appreciate the things we take for granted, like even picking up a spoon.

We love Tommy so much he's a dote and a little blessing in all our lives.
